Safe, Clean Water

PenSOFT

PENTAIR SOFTENING SYSTEM

Product Features

- Made with FRP / Composite Structural pressure vessels ensuring longer life.
- With Automatic Fleck softening valves.
- All major equipments like pressure vessels , valves manufactured in house

Product Applications

- Removal of hardness from water for boilers and other process water applications in industries.
- Removal of hardness from utilities water in buildings and industrial applications.
- Pretreatment for other water treatment plants.

PenSOFT

PENTAIR SOFTENING SYSTEM

About Pentair

Pentair Inc. headquartered in Minnesota in USA is a world leader in providing innovative products and systems used in the movement, treatment and storage of water. It has more than 15000 employees and an annual sales turnover of \$ 3 billion. It operates from more than 50 locations spread across the world and has a product portfolio of more than 30 leading brands. Pentair entered the Indian market in 1998, establishing a manufacturing facility in Goa, corporate office in Delhi and regional offices across India. Since then, Pentair Water India with its innovative technologies has become a leader of water treatment solutions in the country.

As part of its line up of industrial and commercial water treatment systems, Pentair has introduced its PenSOFT range of softening systems. The PenSOFT softening systems are used for water softening and conditioning.
